

RP Data's Macpro Office Manager is a fully featured, integrated software package that makes office management easier and more visible.

Macpro Office Manager offers a single database for property management, sales management, holiday management, body corporate and customer relationship management (CRM) with full trust accounting.

Macpro Office Manager uses double entry accounting to help you manage accounts accurately and efficiently. It also includes a full range of electronic banking facilities, extensive reporting, complete task automation and automatic balance checking.

A fully integrated application, Macpro Office Manager is the complete computerised solution for real estate management. Please call our service centres to arrange an obligation-free demonstration.

10 REASONS WHY MACPRO OFFICE MANAGER IS ESSENTIAL FOR YOUR OFFICE:

- Use a single client record to quickly identify any relationship, past or present
- Increase staff performance and customer satisfaction by using the complete task management system
- A modulated program which can be configured by module and by trust accounts – including IBD Bond Accounts
- Custom report writing facility
- Comprehensive commercial and body corporate modules
- Integrates with your Pocket PM Inspection software
- Communicate using letters, faxes, email or even SMS
- Enjoy the many benefits of using one system to operate your sales and property management divisions
- Integrates with all major electronic banking systems to transfer landlord funds and download tenant payments
- Network ready for use in multi-user and multi-office environments
- Comprehensive commercial and body corporate modules

Since 1991, RP Data has been providing innovative and comprehensive information solutions for the Australian and New Zealand property industry. Through our services, clients obtain the most thorough and up to date property information delivered in real time to increase revenue and productivity, cut costs and extend their capabilities in a highly competitive marketplace.
